At Territon—The Pisher On Com-pany is drilling at 695 feet on its No. 2: 850 feet on No. 2: 150 feet on No. 4. They also have a rig up fer their No. 1 on the Bell farm in southeast of southeast of 18-20-8. Eagan & Griffin are down 1,200

## Crude in North Texas

Wichita Palls, Texas, Aug. 8. Resumption of operations on a larger scale during the past two works by independent retineries in the North Texas district after having reached a low level about the middle of July is causing a reaction in the spot crude oil market with the result that premiums of considerable size are again making their appearance. The delugs of spot crude oil hat was thrown on the market when possed prices were given the first test in the state and Canada has been absorbed or withdrawn for large premiums, while isalic are shipments from the North Texas district to other refining centers in the state and Canada has been a contributing factor in stabilizing the situation.

Movements of crude oil in tank care from the district have increased lately with approximately one thought of the northwest of the northwest of 15-24-1w is abandoned at 2.185 feet. The Comar Oil company No. 4-A See in the southwest of the northwest of 15-24-1w is abandoned at 2.185 feet. I company. Prairie Pipe Line company and other major concerns not to solicit additional pipeline connections until further notice is adding the refineries in securing crude.

A survey was taken on the first of this month on plants operating in the state above the coastal refining territory shows a total of \$7 refining and skimming plants being operated by the major and independent companies. These plants are dent companies. These plants are refining approximately eighty-nine thousand six hundred and twenty-live barrels of crude oil daily, or almost 62 per cent of their possifie daily capacity, which amounts to 14s, 900 barrels. These figures do 148,800 barrels. These figures do not include plants under construc-tion or those that have been idle for

tion or those that have been idle for a long period.

Fuel oil continues to be the most active product on the refined market with prices on an upward trend in spite of the fact that the raw material can be purchased 75 cents per barrel cheaper than was the case less than a month ago when fuel was moving at 90 cents per barrel. The less than a month ago when fuel was moving at 30 cents per barrel. The demand is reported as being good from fuel oil consumers within the state, and a number of inquiries for trainload quantities for deliveries to points in the north and east were in circulation early this week. Large marketing concerns are endeavoring to contract for large quantities to place in storage in anticipation of improved demand and prices as the coal shortage develops. Stocks at the refineries have been greatly reduced during the past three weks. Wichita Falls refiners were receiving from 30 cents to \$1 per barrel for E. B. Lawson has 1,500,000 feet of gas. from 90 cents to \$1 per barrel for their fuel early this week in tank car lots, while Fort Worth concerns were realizing fully 10 cents above this price, owing to freight differential.

South of Tulsa.

The Six and One Oil company test on the Garret farm in the southeast of the northwest of \$3-12-12, is a of gas at 9 feet in the 2.441-foot 10-therel producer after a shot.

Fast of Okmulgee.

The shortage of tank cars is having some hearing on making deliveries to remote points. The scarcity of cars is becoming greater every day, and a number of refiners are knewn to be several days behind on their deliveries. Then considerable difficulty is being experienced in having cars switched to and from the loading racks. The refiners have hopes of the printy order on loaded and empty tank cars issued by the 1. C. C. will reduce the danger of an acute shortage of cars developing. All cars moving from the plants with cargoes are being traced carsfully and no rest is given the railing and no rest is given the railing and no rest is given the railing demand for mixer fresturned.

Buyers ars in full control of the gast week is reported as being somewhat slow. The plant owners to save quoting 56-58 straight run from 12 to 12 1-2 cents per galon, while new navy was being affered liberally at 13 1-4 and 14 1-4 cents. Sixty-six-two gravity gasoline could be had from 15 1-2 to 16 cents.
